Matériel de piquage

L'étalonnage a été réalisé avec le matériel ci-dessous. Il est donc important que l'épreuve soit réalisée avec **exactement** le même matériel.

Nous avons fait fabriquer des plaques de piquage par un EREA (Établissement régional d'enseignement adapté) et acheter les pions pour une centaine d'expérimentateurs : nous pouvons les revendre à prix coûtant plus les frais d'expédition.

Nous fournissons les cotes pour la fabrication pour ceux qui désirent le réaliser.

- **Les pions sont des entretoises**

A = 3 mm B=5 mm C=5 mm D=8 mm Achetées par internet

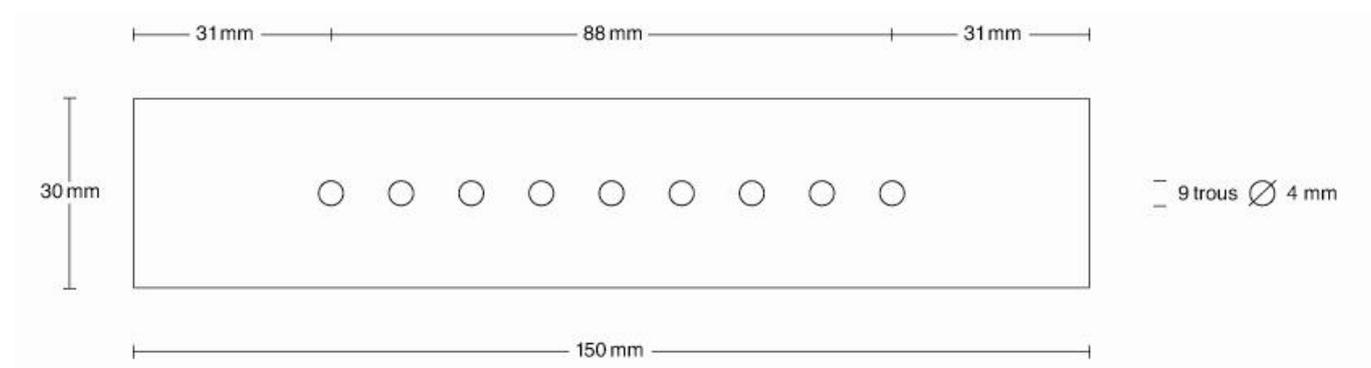

<http://www.skiffy.com/docs/menufr.cfm?taal=f&ID=1&order=order&pagina=inhoudfr.cfm&pag=serieomschr.cfm&serie=304-m>

SÉRIE D'ARTICLE: 304 - Entretoise MF hexagonale référence : 304 3050 411 52

- Matière : laiton, acier, acier inoxydable
- Finition : laiton nickelé, acier zingué, acier inoxydable brut
- De M2 à M8
- Support de carte électronique, mécanique de précision

- **La plaque de piquage**

Epaisseur de la plaque 10 mm

Trous centrés en hauteur et en largeur : 11 mm entre chaque axe de perçage
