Durée : 45 minutes

KID REPORTERS' NOTEBOOK

Dogs that save lives

Alula Alderson September 13th, 2019

Alula with Gemma Butlin and a medical detection dog

1 “Medical dogs are the future,” Gemma Butlin said at a recent presentation and fundraiser for Medical Detection Dogs. Since 2008, this charity in the United Kingdom has been training dogs to sniff out such diseases as cancer, malaria, Parkinson’s disease, and diabetes.

5 I got a chance to attend the event and had a chance to speak with Butlin afterwards. She is the team’s marketing and communications manager.

Butlin explained that these life-saving dogs usually come to Medical Detection as puppies.

[...] The dogs are trained and encouraged with treats or a tennis ball. They know that hard work will come with a reward. But how does it all work?

A STRONG SENSE OF SMELL

10 Using their keen sense of smell, the charity’s dogs sniff samples from both healthy and sick individuals. The samples may contain urine, a swab of saliva, or even worn socks.

If the dog sniffs out an illness in one of the samples, it will make clear that something is wrong. The dog will sit in front of the sample, nudge it, lick it, or stare intently at it. [...]

SAVING LIVES

15 Not only does Medical Detection Dogs train its animals to smell disease, but it also provides Medical Alert Assistance Dogs (MAAD). Claire Pesterfield, who has an assistance dog of her own, also participated in the event. Pesterfield has Type 1 diabetes. Diabetes is a condition that causes blood sugar levels to become too low or too high. If the levels are extreme, a person might pass out. This is a worry that Pesterfield has had on a daily basis.

20 Not anymore. With her dog, Magic, by her side all day, Pesterfield is alerted whenever her sugar levels are unsteady.

For six years, Magic has supported Pesterfield wherever the two go. “In that time, he has alerted me and potentially saved my life over four and a half thousand times,” Claire told the audience.

25 Although you may consider a dog to be a pet, Medical Detection Dogs has proven just how much they are capable of.

READING COMPREHENSION (20 points)

1. Read the text, tick the right box, and write the missing information. /4 (A2)

This document is :

- a page from a novel an article from an online newspaper the script from theatre play

Its title is

Its date of publication is

It was written by

2. Match the corresponding phrases with arrows (→). /4 (A2)

Claire Pesterfield is...	... a Medical Alert Assistance Dog
Gemma Butlin is...	... a woman having diabetes
Magic is...	... a kid reporter
Alula Alderson is...	... a marketing manager

3. Choose the correct answers and justify your choice with passages from the document. /2 (A2)

- Medical dogs can save people’s lives by :

- detecting their disease curing their disease

Justification :

- Medical dogs start their training when they are :

- adults babies

Justification :

4. Pick out from the text the names of four different diseases that the medical dogs can help with. /2 (A2)

- -
- -

5. Say if these statements are RIGHT or WRONG and justify your answers by quoting a passage from the text. /4 (B1)

During their training, medical dogs receive presents in exchange for their good work.

- RIGHT WRONG

Justification:

Medical dogs have to sniff people to detect if they are sick.

- RIGHT WRONG

Justification:

6. Find the contrary of the adjective "sick" used in the text : / 2 (B1)

.....

7. What was the principal objective of the presentation by Gemma Butlin? Choose the correct answer and justify it by quoting a passage from the text. /2 (B1)

- to make people adopt medical dogs. to get money for her organization

Justification:

WRITING (20 points)

The British fiction writer Agatha Christie declared: "The world would be a nicer place if everyone had the ability to love as unconditionally as a dog." Do you also agree that a dog is man's best friend?

Evaluation :

 EXPRESSION ECRITE GENERALE		
A1	A2	B1
L'élève peut écrire des expressions et phrases simples isolées.	L'élève peut écrire une série d'expressions et de phrases simples reliées par des connecteurs simples tels que « et », « mais » et « parce que ».	L'élève peut écrire des textes articulés simplement sur une gamme de sujets variés dans son domaine en liant une série d'éléments discrets en une séquence linéaire.

	A1	A2	B1
Réalisation générale de la tâche	Peut écrire quelques informations personnelles telles qu'elles apparaîtraient sur un formulaire par exemple (1 point)	Peut écrire une note ou un message simple et bref concernant des nécessités immédiates (2 points)	Peut laisser une note pour transmettre une information simple et immédiatement pertinente, en communiquant de manière compréhensible les points qui lui semblent importants (4 points)
Respect de la consigne/ Contenu	Production sans lien direct avec la consigne (lieu, forme, destinataire) (1point)	Production sans lien direct avec la consigne (lieu, forme, destinataire) (1 point)	Intègre bien les contraintes formelles et le contexte de communication (3 points)
Etendue lexicale	Choix élémentaire d'expressions simples pour les informations sur soi et les besoins de type courant (1 point)	Répertoire d'expressions mémorisées lui permettant de communiquer sa pensée dans des situations prévisibles (2 points)	Gamme assez étendue pour exprimer sa pensée sur des sujets abstraits ou culturels en rapport avec ses centres d'intérêt (4 points)
Correction grammaticale	A un contrôle limité des structures et de la morphosyntaxe (1 pointt)	Utilise des structures simples correctement mais commet encore des erreurs élémentaires (2 points)	Utilise de façon assez exacte un répertoire de structures et schémas fréquents (3 points)
Orthographe	Erreurs aussi bien lexicales que grammaticales (1 point)	Des erreurs mais surtout grammaticales (accords...) (2 points)	Peu ou pas d'erreurs (3 points)
Compétence discursive	Expressions et phrases simples isolées. La ponctuation peut être absente ou inadaptée (1 point)	Texte s'appuyant sur des connecteurs simples et dont la ponctuation est globalement maîtrisée (2 points)	Texte cohérent dont la cohésion est assurée par des connecteurs logiques et une ponctuation adaptée (3 points)
